

MEMORANDUM

August 29, 1944.

For: 521

I have cabled London that you and I have agreed to handle certain material received via Barney, heretofore labelled 520-A, on a Unison basis under No. K-27. I also advised London that this was a source related to what I call my 511 source and that I did not feel too sure of it, but thought it might be worth trying.

With the present batch of material are two K-27 messages, which I understand from Andrew you did not receive.
